- 5. Future enhancements**

Origin of the creative idea

In today's urban environments, personal safety and well-being are increasingly becoming major concerns, particularly for those who live or work in high-risk areas. Individuals may feel vulnerable to threats like crime, harassment, or accidents, and often lack the tools needed to effectively protect themselves or respond to emergencies. Moreover, the stresses of daily life, coupled with concerns for personal safety, can take a toll on mental and emotional well-being. While there are various apps available for **tracking safety** or **providing mental health support**, few offer a **comprehensive solution that integrates both aspects in a user-friendly manner**. The need for a **reliable, all-in-one solution that addresses both safety and well-being** has never been greater, especially in a world where individuals are more mobile and exposed to various risks.

Our Logo

And What it symbolises

??

What our website offers??

01.

Send an SOS request to registered emergency contacts with the click of a button.

02.

View nearby emergency services and get directions to each.

03.

Find out how safe your location is.

04.

Take a Stress Quiz to understand your stress level.

05.

Take a stress game to relief yourself.

06.

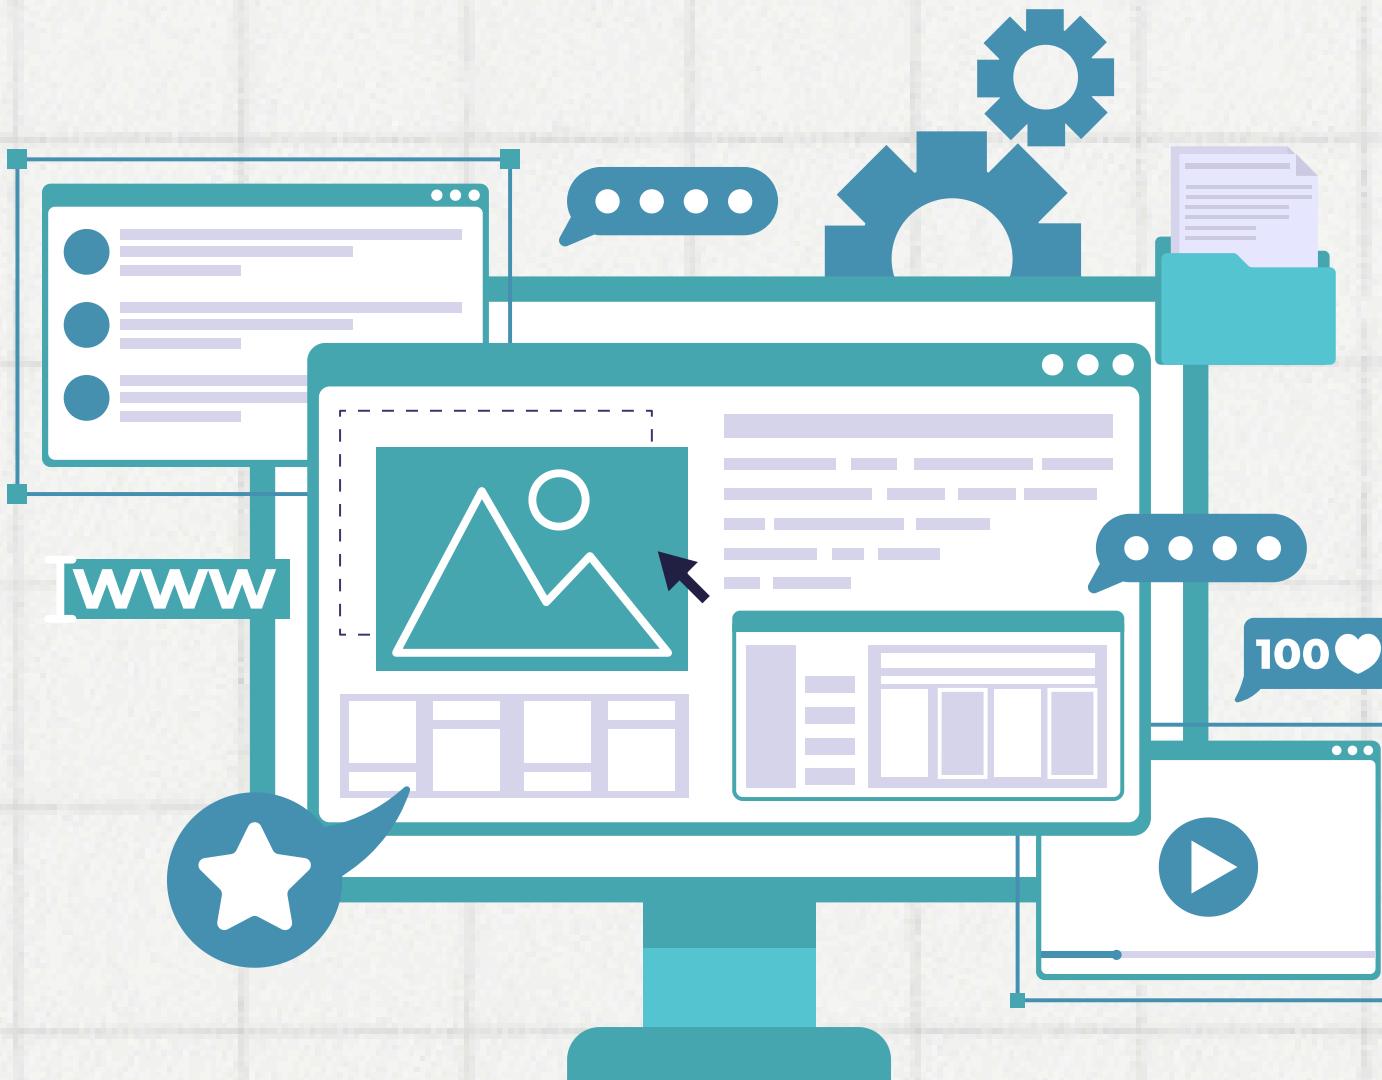

You can get stress relief tips and contact information for doctors for consultation.

Technology Stack

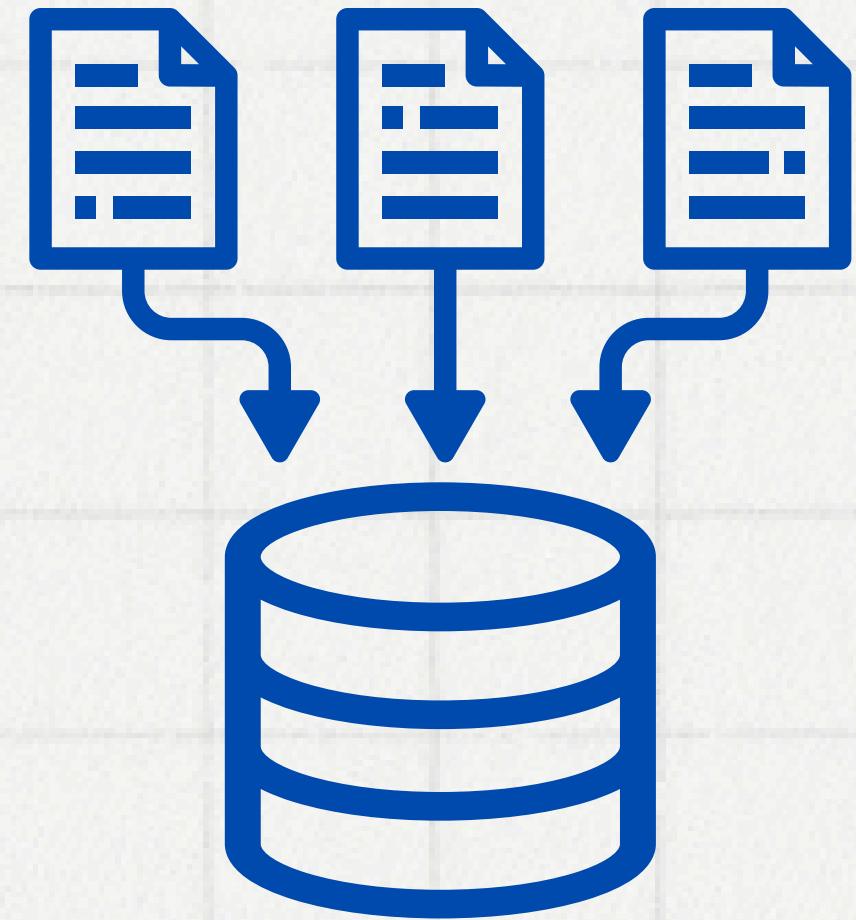

Frontend

- React + Vite
- Leaflet.js
- Geolocation API
- Overpass API
- OSM
- Gemini API

Backend

- Django
- Django REST
- JWT (JSON Web Tokens)
- SQLite

Future steps

- Live location tracking
- OTP verification

**Thank you
very much!**
